ANTOINE'S 2uality Seeds

ANTOINE SEED COMPANY

112-116 E. Lexington St. Independence, Mo.

YOUR FIRST STEP TO BETTER CROPS

Many varieties which only a few years ago were regarded as satisfactory have now been far surpassed through the application of modern methods of plant breeding.

Such methods are fully employed at the breed ing stations, not only to develop new varieties, but also to improve and maintain at their best the standard types which are in general use. In this way seeds are **bred** — not just grown.

A seed is a plant in minature. All its inherited characteristics are there and the grower's greatest care can do no more than develop them.

Choose your seeds with care, therefore, and remember that even the very finest seed costs but a small part of your total outlay in raising a crop. Seeds represent an enduring standard of quality. They are your first step to better crops.

TESTED SEEDS

We conduct our own modern seed laboratory. Our seeds are just as represented. If they prove otherwise, we will refill the orders free of charge or refund the money you paid us for same. If you do not find the article or variety you want, put it on the order anyway, as we carry in stock many items that we do not have room to list in this catalog.

ADVISORY SERVICE

We are glad to answer letters in detail regarding your garden and farm problems, but all requests for information should be written on a separate sheet of paper, and not on orders. It is always a pleasure to help you make your garden a success, and we take pains to answer inquiries promptly and fully.

FREE DELIVERY

We deliver free in the United States, by mail, freight or express, our option, to any express or post office, all Vegetable and Flower Seeds. All other articles, including bulbs, are quoted f. o. b. and postage must be added as per table where goods are desired by parcel post.

Write your name and address distinctly and in full; please use the order sheet and envelope inserted in this catalog.

GENERAL INFORMATION

ORDER EARLY! Our rush comes in March and April. By ordering early, you will receive better service from full stocks.

USE THE ORDER SHEET, as it will be easier for us to fill your order and ship it correctly. Give all necessary information on the order sheet, and if freight or express office is different from your post office address, give both.

PLEASE PRINT YOUR NAME AND ADDRESS on the order sheet, very plainly. Each year we are unable to read the names and addresses on many orders we receive, which means delay and often loss of money.

Poisons cannot be sent by mail. Liquids and goods packed in glass should be sent by express.

We must decline sending goods C. O. D. unless 25 per cent of their value accompanies the order.

HOW TO SEND MONEY

Remittances may be sent either in the form of a Money Order, Bank Check or Draft, or if Currency is sent, it should be registered. Postage stamps are satisfactory for small amounts.

DOMESTIC				
PARCEL POST RATES				
Within the U.	S. and Possessions			
Zones from	Kansas City, Mo.			

Parcel post packages are mailed anywhere within the United States or its possessions, weighing up to and including 70 pounds. Shipments of 20 pounds or over are as cheap if sent by express beyond the third zone.

We do not supply less than one-half pound at pound rate, nor less than one-half ounce at ounce rate. Smaller quantities will be priced at higher rates. All seeds, nursery stock, plants, bulbs, ordered but not listed in our catalog will be given careful consideration and will be invoiced at regular prices.

Listing and prices in this catalog subject to change without notice.

THE ANTONE SEED COMPANY gives no warranty, express or implied, as to the productiveness of any seeds or bulbs it sells and will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seed.

To All Our Friends and Customers:

We are grateful for your fine patronage in the past and we are looking forward to serving you in the future.

We are hopeful for a more settled business world by the beginning of 1949. With the highly appreciated continuance of your fine cooperation, combined with our utmost efforts of doing everything possible for our customers, we promise you the best in merchandise and dependable service.

Our trained personnel consists of men with many years of experience in the seed industry. Our contract growers are the best; growers who are more interested in quality and production, than in profit.

We have grown for us, the strains and varieties that grow and produce best in the area they are to be sown. We want you to have the most successful and productive crops possible.

With our sincerest regards and best wishes,

Yours very truly,

ANTONE SEED COMPANY.

Missouri Seedman's Association Jackson County Farm Bureau Western Seedman's Association Independence Chamber of Commerce

The Antone Seed Company and affiliated bodies has, in the past nine years, made an extensive study of distinctively new varieties. The results of the trials conducted in twelve different sections of the country are decided by impartial judges, to whom the entries are known only by numbers. They are allotted marks for distinctiveness, general usefulness, adaptability, and uniformity. The findings are as follows:

Asgrow Wonder Beet 1934
Scarlet Dawn Tomato 1935
Cucumber Straight Eight 1935

SILVER MEDAL

DILL VIII IIIDIII	
Asgrow Black Valentine Bean	1933
Radish Comet	1936
Imperator Carrot	1933
Beet Perfected Detroit	1934
Golden Hybrid Bantam	1940
Cantaloupe Imperial	1935
Baby Potato Lima Bean	1940

BRONZE MEDAL

Stowell's Evergreen Hybrid Sweet	Corn1934
Ruby King Pepper, Asgrow Strain	1935
Cucumber Cubit	1944

RADISH, COMET GLOBE, (Medium Top)—24 Days. Our pedigreed originator's stock of this very popular variety is outstandingly good, and well adapted to both field culture and greenhouse forcing. Roots oliveshaped, with medium top; bright scarlet, crisp, tender, and of fine quality.

PURPLE KING—80 Days. Used widely in Missouri for Shipping and Trucking. Plant vigorous, rather open, medium height. Fruits medium large, globular, smooth, purplish pink, thick-skinned, very solid and quite free from cracking.

TOMATO, SUPER BREAK O' DAY—68 Days. Resembles Break o' Day and is similarly disease resistant, but has a positive bright red color. Plants have much heavier foliage, affording better protection from sun-scald. A heavy cropper. Fruits medium large, globular; firm and solid; interior ripens slowly. Best adapted to sandy loam soils of the lighter type.

BEET, ASGROW WONDER—57 Days. All-American Gold Medal 1934. Recognized by this award as a variety of supreme excellence, its performance for market growers and shippers in the season since then has confirmed it in a position of leadership. Extra flavor and quality, smooth skin, 15 inch tops for good bunching. A pedigreed stock, the result of many years of pure-line breeding; unsurpassed in earliness, uniformity, and in depth of interior color.

CUCUMBER, CUBIT—68 Days. A long variety which is exteremely popular on account of its excellent exterior color, fine slicing texture and shipping quality.

CORN, GOLDEN CROSS BANTAM—85 Days. The best known and most adaptable hybrid of its kind—a large main crop sort of the improved Golden Bantam type. Very sturdy and reliable, showing high resistance to bacterial wilt (Stewart's disease). Ears 8 inches long, 10—14 rows.

TOMATO, RUTGER'S CERTIFIED—86 Days. This main crop variety has come into wide use by truckers and shippers, and in some sections by canners. Plant vigorous, with medium foliage, resistant to Fusarium wilt and nail-head rust; moderately productive. Fruits medium large, nearly globular, deep red, smooth, solid, with thick walls and cross-sections; of fine quality.

early globular,

Better Seeds - Puts more money in your pockets

ARTICHOKE

Cynara scolymus

A perennial derived from cardoon: grown in California and the South for its flowerheads. Not to be confused with Garasole or Jerusalem Artichoke (Helianthus tuberosus) or Chinese Artichoke (Stachys sieboldi), both of which are grown for edible tubers.

Large Green Globe

Plants thistle-like, 3-5 ft. tall. Heads large, round but slightly elongated, deep green; edible base of scales thick and of delicate flavor.

> PKT. Oz. 1/4 LB. I.B 10c \$1.00 \$3.00 \$12.00

ASPARAGUS

Asparagus officinalis

Mary Washington

Developed by the late Dr. J. B. Norton, U. S. Dept. of Agriculture, for resistance to asparagus rust (Puccinia asparagus); and now by far the most extensively grown variety. Large green spears with tight, purple-tinted tips, of fine quality. Heavily productive and very uniform.

> PKT. Oz. 1/4 LB. IR 10c 20c 60c \$2.00

Martha Washington

Closely related to Mary Washington; a little earlier and perhaps slightly more resistant to rust but not so large or of such excellent quality and uniformity.

PKT. O7 10c 20c 60c \$2.00 One-half pound at pound price.

Palmetto, Conover's Colossal, Columbian Mammoth White-

> 1/4 LB. 10c 20c 60c \$2.00

BEANS

Plant only in warm, well prepared soil, about 4 inches apart, 1½ to 2 inches deep. Under hand cultivation and in poor soil, rows may be 18 to 24 inches apart, in rich fields under horse and tractor cultivation, 30 to 36 inches.

Cultivate only before blooming and never when wet. Plant a succession every two weeks to insure supplies throughout the season.

Allow I pound for every 100 feet of row, 1 to 1½ bushels per acre.

DWARF OR BUSH

Asgrow Stringless Green Pod

All-America Gold Medal for 1933; now one of the most popular varieties for truckers, canners and Hardy, widely home gardens. adapted and a very dependable cropper. Plant medium large, erect, somewhat thick stemmed, heavily productive. Pods nearly straight, dark green, round, meaty, succulent; entirely stringless, totally without fiber, of outstanding qaulity. Seed oblong, purple mottling on buff with brownish cast: 67 per oz. Length of pod 61/4 inches. Width of pod 3/8 inches. Matures in 52 days.

10 LBS. 100 LBS. 5 LBS. 10c 45c \$2.00 \$3.80 \$32.00

Asgrow Black Valentine

All-America Silver Medal for 1933. Highly popular with quality shippers and market gardeners. Similar to the old Black Valentine except that it is free from strings. Plant large, erect, prolific. Very attractive oval pods, nearly straight, dark green, strictly stringless, and of fine quality and delicate flavor; retain color and texture in shipping long distances: seed oval, solid black: 90 per oz. Length of pod 634 inches. Width of pod 3/8 inch. 49 days.

1 LB. 5 LBS. 10 LBS. 100 LBS. PKT. 10c 45c \$2.00 \$3.80 \$32.00

Black Valentine

Long a shipping variety, which holds its firmness and color well after picking. Pods oval, dark green, but stringy. Length of pod 7 inches. Width of pod ½ inch. 49 days.

PKT. 1 LB. 5 LBS. 10 LBS. 10

10c \$2.00 45c \$3.80 \$32.00

Bountiful

An important early variety on northern and eastern markets and in home gardens. Plant medium large, prolific, thrifty. Pods flat, light green, stringless, slightly fibrous and of good qaulity. Seed straw colored: 65 per oz. Length of pod 7 inches. Width of pod ½ inch. Matures in 49 days.

5 LBS. 1 LB. 10c 45c \$2.00 \$3.80 \$32.00

Burpee's Stringless Green Pod, Improved

Since its origination in 1894 by Calvin N. Keeney we have markedly improved this sturdy variety. Plant bushy and productive. Pods nearly round, slightly curved, stringless and fiberless. Seed coffee- brown: 75 per oz. Length of pod 5½ inches. Width of pod 7/16 inch. 50 days.
PKT. 1 LB. 5 LBS. 10 LBS. 100 LB

Ркт. 10с 45c \$2.00 \$3.80 \$32.00

Canadian Wonder

Plant large and erect. Pods light green, thick-flat, straight, fibrous and stringy. Seed large, maroon color: 50 per oz. Length of pod 7 inches. Width of pod ½ inch. Matures in 68 days.

Ркт. 10с 1 LB. \$2.00 45c \$3.80 \$32.00

Commodore

All-America Silver Medal for 1938. Introduced by Zwaan & Van der Molen. Plants erect and vigorous. Pods long, nearly straight and round, somewhat of Kentucky Wonder type, fleshy, fiberless and stringless. Seed red wine colored. Length of pod 8 inches. Width of pod 1/2 inch. Matures in 65 days.

5 LBS. 10 LBS. PKT. 1 LB. 100 LBS 10c 45c \$2.00 \$3.80 \$32.00

Davis Stringless Wax

Plant medium large. Pods thickflat, light yellow, straight; stringless but fibrous. Seed white, kidney shaped: 70 per oz. Length of pod 6 inches. Width of pod ½ inch. Matures in 52 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 45c \$2.00 \$3.80 \$32.00

\$32.00

Full Measure

For market garden and canning.

An excellent variety under favorable conditions but less hardy and more susceptible to disease than others. Plant upright and prolific. Pods round, nearly straight, very fleshy, stringless and tender; medium green. Seed reddish brown mottled with buff: 66 per oz. Length of pod 6 inches. Width of pod % inch. Matures in 53 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 45c \$2.00 \$3.80 \$32.00

Giant Stringless Green Pod

Originated by Calvin N. Keeney; introduced in 1898. An excellent variety for market garden and shipping; also extensively used for canning. Plant large, sturdy, prolific. Pods almost round, meaty, strictly stringless and brittle; without fiber or parchment, with marked indentations between the beans; color medium green. Seed oval, solid yellowish brown: 72 per oz. Length of pod 6½ inches. Width of pod ½ inch. Matures in 53 days.

1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 45c \$2.00 \$3.80 \$32.00

Tendergreen, or New Stringless

The leading all purpose round pod stringless bean for market gardeners, shippers, and canners. An improved type widely adapted, increasing in popularity every year. Truly a beautiful bean with excellent qualities. Recommended as adapted to freezing preservation. Length of pod 6½ inches. Width of pod ½ inch. Matures in 53 days.

100 LBS. 5 LBS. 10 LBS. PKT. 1 LB. 10c \$2.00 \$3.80 \$32.00 45c

Logan

Developed at the U.S. Vegetable Breeding Laboratory from U.S. No. 5 Refugee and Stringless Black Valentine primarily for resistance to adverse conditions in the Southeast. Plant vigorous and erect, resistant to common bean mosaic and powdery mildew. Pods will set in hot weather but are borne rather low; round, green, stringless and relatively resistant to spotting from bacterial blight. Seeds dun mottled with brown: 70 per oz. Length of pod 6 inches. Width of pod % inch. Matures in 55 days.

Burpee's Improved

Plant large, erect, vigorous, very productive; pods in clusters of 5 or 6, averaging 4 seeds each. Dry beans, large, plump, flat-oval, white with greenish tinge: 20 per oz. Length of pod 5 inches. Width of pod 14 inches. Matures in 75 days. 1 LB. 5 LBS. 10 LBS. PKT. \$2.25 \$4.00 \$35.00 10c 50c

Fordhook (242)

Large seeded potato lima type. Plant large, upright, very sensitive to environment, highly productive. Pods straight, with thick fibrous walls; contain 3-4 large, thick-oval beans of excellent quality. Dry beans white with tinge of green: 22 per oz. Length of pod 4 inches. Width of pod 1 inch. 75 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c 50c \$2.25 \$4.00 \$35.00

Baby Potato

A prolific variety begun as a field cross between Henderson's Bush Lima and one of the potato lima types. In plant character and general appearance of pods is similar to Henderson's Bush and can be handled by the same cultural methods. The seeds are small but thick, of bright green color when fresh, and similar in flavor to Fordhook. Length of pod 2¾ inches. Width of pod ¾ inch. 72 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c 50c \$2.25 \$4.00 \$35.00

Pride Bush

Similar to Henderson's Bush in type, but with larger plant and somewhat larger pod and seed: 65 per oz. Length of pod 3¼ inches. Width of pod ¾ inches. 69 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c 50c \$2.25 \$4.00 \$35.00

Henderson's

Sometimes called Baby Lima, and known in the South as a Butter Bean. Used largely by canners. The Asgrow strain has been bred particularly for increased yielding power and concentration in season. Plant small, dark green, erect, bushy, very early. Pods flat, containing 3-4 flattish, small oval beans. Dry beans creamy white: 90 per oz. Length of pod 2¾ inches. Width of pod ¾ inch. Matures in 65 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c \$50c \$2.25 \$4.00 \$35.00

Green-seeded Henderson

In response to repeated requests, we have developed a strain of Henderson's Bush, similar to the original in all respects except that the seeds do not turn white at maturity. Seed will be available for 1949 plantings. Length of pod 2¾ inches. Width of pod ¾ inch. 65 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c \$50c \$2.25 \$4.00 \$35.00

King of the Garden

The most widely used pole lima; introduced by Frank S. Platt in 1883. Plant tall, good climber, hardy and vigorous, heavily productive. Pods flat, smooth with 4-5 large oval greenish white beans. Length of pod 7 inches. Width of pod 11/4 inches. Matures in 88 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c 50c \$2.25 \$4.00 \$35.00

Sieva (Carolina Small White)

Grown extensively in the South where it is known as Butter Bean. Plant 10 ft. tall, hardy, vigorous climber, bears over long season. Pods medium green, contain 3-4 beans of excellent quality. Seed white, flat, smooth: 75 per oz. Length of pod 3 inches. Width of pod 34 inch. Matures in 77 days.

BEETS

ARE EASILY GROWN

One of the profitable crops for the market grower. If desirable, to be very early, they may be grown in the hotbed and transplanted. Plant as early in the spring as the weather will permit. Beets will stand light frost, but care must be taken, as a heavy frost will destroy them. The rows should be 16 to 20 inches apart and seed planted from 1 to 1½ inches deep. Thin to 2 to 3 inches apart. Plant some thickly for greens. For fertilizer, we recommend Vigoro.

Plant 1 oz. to 100 feet of drill. Ten pounds will sow an acre in 18 inch rows.

Asgrow Wonder

All-America Gold Medal 1934; since then has been confirmed in leadership by growers and shippers. A pedigreed stock, the result of many years of breeding; unsurpassed in earliness, uniformity, and depth of interior color. Distinctive green tops, erect, uniform in size and color, bunching very attractively for market. Roots round when young, semi-globular later, deep red, smooth, with small neck and tap root. Flesh deep dark red, tender, and of excellent quality. Recommended in place of the old Boston Crosby. Matures in 57 days.

CABBAGE

Our cabbage seed is produced largely in the Puget Sound section at our western Washington production branch from seed stocks of highest quality. Each year the vatious varieties are checked at our Eastern breeding station, Milford, Conn., to guard the vital factors of earliness, eveness of maturity and uniformity.

The column of Days gives relative period to maturity from setting out plants.

Varieties marked y.r. have been developed, mainly at the University of Wisconsin, for resistance to the cabage-yellows disease. It is recommended that only these varieties be planted in infested areas.

The earliest cabbages are started under glass and transplanted when 4 to 6 inches high, into rows 2 to 2½ feet apart, with 18 inches between plants. Later, larger sorts need more room.

Each ounce of seed should produce about 3000 plants and an acre of cabbage will contain 12,000 to 15,000 plants.

Golden Acre (special)

An extra early Copenhagen type with small, round, quite solid heads, maturing with Jersey Wakefield. Plant dwarf, with few outer leaves; used by truckers for the early markets. Diameter of head 6 inches. Weight of head 3 pounds. 64 days.

PKT. Oz. 74 LB. LB. 10c 50c \$1.50 \$6.00 One-half Pound at Pound Price

Green Acre

A strain of Golden Acre recently introduced from Europe. The type and general characteristics are the same but Green Acre holds its green color longer and is thus of added value to market gardeners and shippers. Diameter of head 6 inches. Weight of head 3 pounds. 66 dayh.

CARDOON

Cynara cardunculus

Smooth Solid

An almost spineless variety $4-4\frac{1}{2}$ ft. high with broad solid stalks of good eating quality.

PKT. OZ. ½ LB. LB. 10c 50c \$1.50 \$6.00

CANTALOUPE and MUSKMELON

Cucumis melo

The days of maturity for the different varieties are based on average results obtained from plantings in Colorado.

Demand a light sandy soil, and planting should not be done until the ground has become dry and warm. Sow 6 to 12 seeds to a hill, the hills to be 6 feet apart each way, and cover ½ inch deep. When the plants have produced their rough leaves, thin to three plants to a hill. Pinch out ends of the growing shoots to induce early fruiting. We recommend Vigoro.

Hale's Best, Improved No. 36, Asgrow Strain

Our improved strain of Hale's Best, developed from No. 36 for uniformity in shape and complete netting with sutures nearly eliminated. An outstanding shipping and market variety. Fruits 3-4 lb. with exceptionally thick, deep salmon colored flesh; sweet, aromatic and of very fine quality. Length 6", Diameter 5½", Days of Maturity 80.

PKT. Oz. 1/4 LB. LB. 10c 20c 60c \$2.00

Hearts of Gold (Hoodoo)

Grown extensively for local markets. Fruit nearly round, 3 lb.; distinctly ribbed, deep green, covered with fine gray netting. Flesh very thick, deep, salmon; tender, juicy, sweet and aromatic. Length 6", Diameter 6", Dadys of Maturity 90.

PKT. OZ. 1/4 LB. LB. 10c 20c 60c \$2.00

Honey Rock (Sugar Rock)

Introduced by the J. C. Robinson Seed Co. All-American Gold Medal for 1933. Fruits nearly round, 4 lb. Skin gray-green, covered with coarse, sparse netting. Flesh thick, juicy, orange-salmon, with very fine flavor; ¼" green ring beneath rind. Good for home use and local early markets. Length 6", Diameter 5½", Days of Maturity 81.

PKT. OZ. ½ LB. LB. 10c 20c 60c \$2.00

Bender's Surprise

Fruits thick-oval, 7 lb.; coarsely netted, distinctly ribbed; skin hard and greenish yellow at maturity; flesh bright salmon; of delicious quality; can be shipped short distances. Length 8", Diameter 7", Days of Maturity 90.

CARROT

Planting stocks are developed at our Breeding Stations from individual progenies which have met the most exacting specifications in performance. Smoothness and shapeliness of roots with depth of exterior and interior color are vital factors in rating parent lines.

In giving the number of days for the development of roots, we have used the average of readings for a period of years. These will vary considerably in different locations.

Carrots prefer deep, loose, fertile soil, but will thrive in good, well-worked garden soil. In April, as soon as the ground is warm and fit to work, sow the seed for the first crop, and make successive sowings until August 1, the last being for fall and winter use.

Plant seed ½ inch deep, in rows 12 to 15 inches apart, and thin plants to 3 to 4 inches paart in row. Use Vigoro for forcing.

Imperator

Our introduction; received All-America Silver Medal for 1933. An outstanding type specially developed to meet the demand of the critical market for a long, smooth, handsome carrot. Tops medium, but strong enough for good bunching. Roots have rounded shoulders. smooth, deep rich orange; uniformly tapered to a semi-blunt end. Flesh rich orange color, extending to center of root; fine grained, tender and of excellent quality. Imperator so nearly meets market growers' and shippers' specifications of the ideal carrot that in many sections it has practically displaced all other varieties. Length 8", Diameter 11/2", Days 77.

> 1/4 LB 10c 20c 75c \$2.00

Chantenay, Improved

A well known and popular all-purpose variety; desirable for home and market gardens, and for canners in packing diced carrots; a good cropper. Roots deep orange, smooth, tapered, stump-rooted; flesh deep orange with indistinct core. Length 5½", Diameter 2", Days 72.

1/4 LB. 75c Oz. 20c 10c \$2.00

Chantenay, Red Core

Developed and introduced by C. C. Morse & Co. A desirable Chantenay with good interior color; valuable for canners and market gardeners. Roots somewhat shorter than Improved Chantenay; flesh reddish orange, with indistinct core of nearly the same color as the surrounding flesh; tender and sweet. Length 5", Diameter 2", Days of Maturity 72.

1/4 LB. PKT. 07 LB 10c 20c 75c \$2.00

Danvers, New Long Strain

We have bred an outstanding, fine, long strain of this important variety; used by home and market gardens, and extensively for shipping. Roots, tapered to a blunt end, bright orange throughout, tender, and of good quality. The original shorter strain is also available. Length 7", Diameter 2", Days 75.

> PKT. Oz. 1/4 LB. LB. 10c 20c 75c \$2.00

Nancy

A recent introduction developed at our Pacific Coast breeding station to provide a variety intermediate between Nantes and Chantenay. Roots larger at shoulder than Nantes, tapering slightly to a blunt end, with short tops, strongly attached. An attractive variety of high table quality; intense reddish-orange flesh with small core of same color, crisp, tender and of fine flavor. Length 6", Diameter 1½", Days of Maturity 70.

COLLARD

Brassica oleracea var. acephala A non-heading type of cabbage, used extensively in the South for "areens."

Cabbage Collard

Medium tall, with a cluster of loose folding, tender leaves, which can be left on the plants and picked as needed. Of Georgia origin, from a cross between Georgia collard and Jersey Wakefield cabbage, and well adapted to Southern conditions.

PKT. OZ. 1/4 LB. LB.
10c 15c 35c \$1.00

Georgia (Southern)

The olr standard variety. Plant upstanding, and vigorous, with large, undulated leaves; withstands heat and adverse soil conditions. Of fine quality when cooked.

PKT. Oz. 1/4 LB. LB. 10c 15c 35c \$1.00

Louisiana Sweet

An attractive new strain of the old Georgia collard bred by Dr. J. C. Miller of Louisiana Experiment Station. Plant tall, hardy, with a cluster of large, thick, tender leaves. Leaf area much greater and with less leaf stem than other varieties.

PKT. Oz. ½ LB. LB. 10c 15c 35c \$1.00

SWEET CORN

Sweet corn has been a leader with us for over 30 years. Our production program includes the maintenance of excellent strains of standard sorts and the development of new, superior lines.

Through the use of more recent breeding methods for the improvement of sweet corn varieties, we have developed, through nearly 20 years of controlled pollination, many inbred lines of high merit. The crossnig of these produces hybrids of outstanding vigor, uniformity and productivity. Disease resistance is also a vital factor and we can now furnish various varieties that are highly resistant to Stewart's disease or bacterial wilt.

The number of days indicated for each variety represents average trial row readings for many years at our Eastern breeding station, Milford, Conn.

In some sections maturity dates will naturally be different.

Varieties listed in larger letters are, in our judgment, the better and more important.

Varieties marked (y) have yellow kernals; those marked (w) have white.

HYBRIDS

A hybrid is the first generation of a cross between strains of different perentage and involving one or more inbred lines of corn or their combinations.

Sweet or Sugar

One quart will plant about 200 hills.

Plant corn every three weeks from April to July, for succession, placing 6 seeds in a hill, the hills 3 feet apart each way, and covering $\frac{1}{2}$ inch. When well up, thin to three plants to a hill.

Country Gentleman Hybrid (Ill.) 5 x 10 (w)

Also originated by Prof. Huelsen and admirably adapted to Midwestern conditions. A prolific variety, giving high yields except in extreme drought when it is easily outclassed by Hybrid 8 x 6. Height 7½ ft.; Length of ears 7½ inches; 98 Days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c 60c \$3.00 \$5.50 \$50.00

Golden Cross Bantam (y) Hybrid

Developed by Glenn M. Smith and introduced jointly by the U. S. Department of Agriculture and Purdue University. The result of crossing P39 and P51. Extremely uniform in plant and ear characteristics and in maturity. Highly resistant to Stewart's disease. Now the most extensively used hybrid. Widely adapted to canners' use and excellent for market gardeners. Stalk sturdy and upright. Ears 10-14 rowed, kernals rich yellow in color, medium in width and depth. Height 6 ft.; Length of ear 8 inches; 85 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 40c \$2.00 \$3.50 \$33.00

It is wise to place your order early

Marcross C6.13 (y) Hybrid

Developed by the Connecticut Experiment Station as a first early market and home-garden variety. Introduced in 1937 and already in wide demand. Stalks short but sturdy, highly resistant to Stewart's disease. Ears long, plump, abruptly tapered at tips; 10-14 rowed, with light cream-yellow, medium broad kernels of good quality. Height 5 ft.; Length of ear 7 inches; 72 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 40c \$2.00 \$3.50 \$33.00

Stowell's Evergreen Hybrid 14x5 (w)

Our development from crossing inbred evergreen lines Asgrow 14x Asgrow 5. All-American Bronze Medal for 1934. Highly valuable to market gardeners and canners, especially in the East. Stalks sturdy with close growing upright ears, 4 feet from ground; foliage medium green. Ears very slightly tapered, uniform, with 16-18 rows. Kernels white, medium-wide, deep; medium cob. 8 ft. tall; 8 inch long ears; 93 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c \$2.50 \$4.50 \$40.00

Tendergold (Top Cross Sunshine) (y) Hybrid

A good variety maturing ahead of Golden Cross Bantam. Stalk sturdy with good foiliage; highly resistant to Stewart's disease. Ear nearly cylindrical 12-16 rowed, kernals medium in width and depth, golden yellow, tender and of good quality. Height 5½ ft.; Length of ear 7½ in.; days 81.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100

Ioana (y) Hybrid

Originated by Dr. E. S. Haber of Iowa State College, commercially developed and entered by us in the All-American Selections trials for 1939 when it was awarded a Bronze Medal. An attractive and productive variety, highly resistant to drought and wilt, suitable for either gardener or canner. Plants tall and sturdy, with broad and numerous leaves. Ears 7½"-8" long, 12-14 rowed, cylindrical; well filled with medium-narrow, light yellow kernals.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100

Country Gentleman (Shoepeg) (w)

A prolific variety of excellent quality. Stalks often with two ears. Kernals very deep, slender, sweet, with tender hull, and set irregularly without row formation. Height 7 ft. Length of ears 7 inches; 95 days.

CUCUMBER

Cucumis sativus

The breeding of new strains and improvement of standard sorts of cucumbers is carried on at breeding stations in Colorado and California. Exceptional care is exercised in the isolation of breeding plots to prevent hybridization.

The number of days indicates the relative time required from planting of seed to first picking of fruits for slicing. The figure should be reduced by several days for small pickles and increased slightly for full grown fruits.

The letters b. s. indicate black spined varieties and w. s. white spined.

For an early crop, plant the seed in a hotbed or in paper pots. The plants will be ready to transplant in open ground in from three to six weeks.

Set in hills 4 feet apart each way, thinning out to about 4 plants to a hill when established. Plant seed in hills in May. For pickles, plant last two weeks of June.

l oz. will sow about 100 feet of drill.

Marketer, w.s.

A distinctive Asgrow variety developed at our Eastern breeding sta-Awarded the All-American Bronze Medal for 1943 and quickly acclaimed for the trim appearance and uniformity of its many fruits, with their rich dark color carried well down to the blossom end. Vine very vigorous and prolific; fruits slightly tapered, seed area exceptionally small. A popular variety for the early market and throughout its long bearing season. Length 8 in.; Diameter 21/4 in.; Days 65.

Large American Flag (London Flag)

An early popular sort. Stems 8"-10" long, 1½" thick; white, and attractive. Leaves large, medium green, drooping backwards.

PKT. OZ. ¼ LB. LB. 10c 60c \$2.00 \$6.00

LETTUCE

Lactuca sativa

Our stocks are bred for productivity, uniformity, and high quality. The number of days represents the time required to develop marketable heads from the planting of seed, under average conditions. However, since the maturity of New York types varies with weather and growing conditions in the lettuce producing sections of California and Arizona, the time required to develop heads indicates relative maturity rather than exact period of growth.

The letters b.s. indicate black seeded varieties, and w.s. white seeded.

If in doubt — Get back at Ease Plant ANTOINE SEEDS; they please For an early crop of Head Lettuce, sow the seed in February or March in the hothouse, or in boxes or flats in the house, and transplant as soon as the ground can be worked. Set in rows 18 inches apart and 8 to 10 inches apart in row. Sow seed outdoors every two weeks for a succession, covering lightly by raking, so that the birds do not get to it. It is best to sow lettuce in rows, as it can be cultivated.

Grand Rapids, b.s.

One of the most popular loose leaved varieties. Excellent for early planting outside, and for greenhouse forcing. Plants erect and compact; leaves light green, broad, wavy, curly, and heavily fringed. A handsome sort; very tender and sweet when grown under glass. Days 43.

PKT. Oz. ½ LB. LB. 10c 15c 50c \$1.50

Grand Rapids (Ohio) Dark Green b.s.

A very attractive, new strain, especially good for forcing; differs from Grand Rapids only in its darker color. Days 43.

PKT. Oz. ¼ LB. LB. 10c 15c 50c \$1.75

Simpson's Early Curled w.s.

(Early Curled Silesia)

Probably the most widely used of all varieties for home gardens. Early, hardy, and dependable; loose leaved, with large leaves, somewhat less crumpled and frilled than black-seeded Simpson, forming a compact central bunch; color yellowish green; tender and sweet. Days 45.

PKT. Oz. ½ LB. LB. 10c. 15c 50c \$1.50

Simpson's Curled, b.s.

A popular early loose leaved variety, large and compact, with broad, light green leaves, crumpled and frilled on the edges; crisp and very tender. Used extensively in home and market gardens. Days 46.

PKT. Oz. ¼ LB. LB. 10c 15c 50c \$1.50

Oak Leaf w.s.

An old variety which has returned to favor among home gardeners because of its tender texture and resistance to heat. Leaves somewhat similar in outline to large oak leaves, medium green, compactly set. Days 40.

PKT. Oz. ¼ LB. LB. 10c 35c \$1.00 \$3.00

Big Boston (Trocadero), w.s.

A very popular variety for cold frame forcing and for outside culture. Head of medium size, and compact, with creamy yellow heart. Leaves smooth, glossy; wavy at the edge, which is slightly tinged with reddish brown. Days 75.

PKT. Oz. ¼ LB. LB. 10c 15c 50c \$2.00

Hanson (Nonpareil), w.s.

An old favorite for home and market gardens; hardy and sure heading. Heads large, globular, compact, tender and sweet; leaves large and broad, and curly, light yellowish green. Good for midsummer planting. Days 80.

PKT. Oz. ¼ LB. LB. 10c 15c 50c \$2.00

Iceberg, w.s.

Very desirable for home gardens and local markets. A large, late variety with wavy, fringed, light green leaves, tinged at the edges with reddish brown. Resistant to heat. Heads compact, crumpled, crisp and sweet; white interior. Quite different from the shipping variety, New York, which is usually called Iceberg in the produce trade. Days 84.

PKT. OZ. ½ LB. LB. 10c 35c \$1.00 \$3.00

Imperial No. 44, w.s.

A development from Imperial No. 152 which has proven to be valuable in the East and Southeast, where it heads better in warm weather and is appreciably less subject to tip burn. Hard, well formed heads, with long leaves. Days 82.

PKT. Oz. ¹/₄ LB. LB. 10c 35c \$1.00 \$3.00

Imperial No. 847, b.s.

Originally developed as a brownblight-resistant variety for summer planting in California, has in recent seasons given most satisfactory results in other sections and is now a very important variety. Heads are medium large, hard, fine and well covered by the inner leaves. Stands up well in summer weather, resisting tip burn. Days 84.

PKT. OZ. ¼ LB. LB. 10c 35c \$1.00 \$3.00

Chicken Lettuce, w.s.

A hardy, tall growing, non-heading, dark green variety, producing the largest amount of leaves of any lettuce, for poultry and rabbit feed. Days 82.

PKT. Oz. ¼ LB. LB. 10c 15c 50c \$2.00

New York, w.s. (Wonderful, Los Angeles)

The pioneer of long distance shipping varieties. A large, curled, heading lettuce, with dark green leaves which are slightly curled on the edges. Heads are well blanched, sweet, tender, and of excellent quality. Days 80.

PKT. Oz. ¼ LB. LB. 10c 35c \$1.00 \$3.00

For best results all summer — sow lettuce seed every two weeks

Prize Head, w.s.

An early non-heading sort, very desirable for home garden use. Plants of medium size, crisp and tender; color light reddish brown on a medium green base; leaves crumpled and highly frilled at the edges; of excellent flavor. Days 47.

PKT. Oz. ¼ LB. LB. 10c 15c 50c \$2.00

White Paris Cos (Trianon), w.s.

Widely used for greenhouse planting, as well as by home gardeners and truckers. A medium large self-folding sort, with medium dark green, erect, smooth, concave leaves. Head compact, solid, with greenish white interior; crisp, and of excellent flavor. Growth 66 days.

PKT. Oz. ¼ LB. LB. 10c 15c 50c \$2.00

Great Lakes, w.s.

A sure-heading variety, dependable for summer production. Leaves large, thick, glossy and well-folded; ribs heavy. Slow-bolting, shows considerable resistance to tipburn. Growth 83 days.

PKT. OZ. ¼ LB. LB. 10c \$1.00 \$2.00 \$7.00

MUSTARD

Seed resembles that of cabbage and turnip. For an early crop, sow in the hot bed in March. Sow outdoors in drills 8 to 12 inches apart at intervals throughout the spring and summer, and cut when not over 2 inches high. Fine used as salad or cooked like spinach.

Black (Brown) Brassica nigra

Usually regarded as a weed, but grown in California for its small, dark brown, pungent seeds, used for the manufacture of table mustard. Plants 5 ft. tall or more, bearing many pods.

PKT. Oz. ¼ LB. LB. 10c 15c 25c 75c

Southern Giant Curled (Long Standing)

The leading mustard. It is unquestionably the most popular and widely known. It represents a high standard in quality and attractiveness. Plant large and upright in growth. Leaves, large, long oval, crumpled, curled, and fringed on the margins, bright medium light green in color. Seeds reddish brown. All America Selection G. M. 1935.

PKT. OZ. ¼ LB. LB. 10c 15c 25c 75c

Fordhook Fancy (Ostrich Plume)

Brassica juncea var. crispifolia

A handsome, upright growing, mild variety, slow to bolt seed stalks; leaves bright green, plume-like, and deeply fringed on the edges; excellent for salads; seed reddish brown.

PKT. OZ. ¼ LB. LB. 10c 15c 25c 75c

Mustard Spinach (Tendergreen) Brassica juncea

A quick growing variety particularly suited to the South. Leaves oblong, thick, fairly smooth, dark green with lighter green ribs; slow to seed, resistant to heat and drought; combines flavor of mustard and spinach.

Brassica juncea var. crispifolia The best known and most popu-

The best known and most popular sort for greens. Leaves long and wide, light green, tinged with yellow, heavily crumpled and curled at the edges. Seeds small, reddish brown. Used widely in the South.

PKT. OZ. ¼ LB. LB. 10c 15c 25c 75c

White London

Brassica alba

A rapid growing upright plant which quickly goes to seed. Leaves dark green, may be used in salads when young. The large pale brown seeds are used for table mustard.

PKT. Oz. ½ LB. LB. 10c 15c 25c 75c

OKRA OR GUMBO

l oz. will sow about 100 ft. or drill

Dwarf Green or Dwarf Green Prolific

A very early and productive sort. A vigorous grower which produces remarkable pods. Plant is 2 to 2½ feet in height, sturdy, hardy, and well branched. Pods are 4 to 4½ inches long, dark green, ridged, pointed, tender, and fleshy; a very good flavor for soups and stews.

Matures in 50 days.

Perkins' Mammoth (Tall Green)

Pods bright, deep green, slender, meaty, tapered, and ribbed. A valuable market and canning variety. Height of plant 5 ft.; Mature pods 7 inches; Days 56.

White Velvet

Plant early, prolific; pods creamy, sometimes pale greenish white, meaty, tender; smooth, round and pointed. Height 4½ ft. pods 6 inches, 60 days.

ONIONS

Very fine onions are produced by sowing the seed in the hotbed early in February and transplanting to the open, about six inches apart. All onion seed is black, three-cornered, and about one-sixteenth of an inch in diameter. Sow seeds outdoors in rich, sandy loam, in hills one foot apart, as early as possible, and cover with fine soil. When plants are strong enough, thin to 3 or 4 inches apart. One oz. will sow about 100 ft. of drill. 5 to 6 pounds to the

Prizetaker (Denia)

A popular shipping sort grown extensively in the South. Bulbs large, globe shape; skin thin and glossy, of straw color; flesh coarse but mild. The Asgrow strain is very productive. 105 days.

PKT. Oz. ¼ LB. LB. 10c 50c \$1.50 \$5.00

Green Bunch

A bulbless bunching variety, grown for its very long, pure white stems; long standing, tender and of delicate flavor. Resistant to pinkroot, thrips and smut.

PKT. Oz. ¼ LB. LB. 10c 50c \$1.50 \$5.00

Crystal Wax

Sometimes called White Bermuda. Grown extensively in Texas for first early shipments to Northern markets. Bulbs very flat, medium sized, clear white; of mild, delicate flavor. Our strain represents many years of continuous selection. Maturity 93 days.

PKT. Oz. ½ LB. LB. 10c 60c \$2.00 \$6.00

Southport Red Globe

The finest of the red onions. Bulbs perfectly round, of good size, with small neck and thick, deep purplish red skin; flesh white, tinged with pink; of strong flavor. Productive, and a good keeper. Matures in 110 days.

PKT. Oz. ¼ LB. LB. 10c 50c \$1.50 \$5.00

Southport White Globe

The best of the white varieties. Bulbs round, medium sized, solid, pure white, very attractive; skin thin and delicate; flesh waxy white, fine grained, and mild. Keeps well in fall storage. Matures in 110 days.

PKT. OZ. ½ LB. LB. 10c 50c \$1.50 \$5.00

Southport Yellow Globe

The first strain of Yellow Globe Onions developed in this country was named after Southport, Connecticut, where it originated. Used for storage and shipping. Bulbs round with slight elongation, medium size, solid, rich yellow, skins tough and clinging. Flesh white with creamy tone. Matures in 115 days.

PKT. Oz. ¼ LB. LB. 10c 50c \$1.50 \$5.00

Use Convenient Order Blank in Rear

Yellow Bermuda (White Bermuda)

A medimum sized, flat sort for early market. Skin light straw color, thin and loose; flesh nearly white, sweet and mild. The dual name arises from lack of positive color. Grown extensively in Texas and Southern California for early shipments to Northern markets. Days 93.

PKT. OZ. ¼ LB. LB. 10c 60c \$2.00 \$6.50

White Sweet Spanish

The largest of the white onions. Bulbs globular with small neck, pure white; flesh clear white, firm and mild. Very attractive, and a fair keeper. Matures in 110 days.

PKT. OZ. ½ LB. LB. 10c 60c \$2.00 \$6.50

Yellow Sweet Spanish

An increasingly popular large yellow variety of Spanish origin, similar to Prizetaker, but larger. Globular, with golden yellow skin; flesh white, mild, very sweet and of pleasing flavor, desirable for shipping and fall storage. We are producing leading strains of this important item. Matures in 110 days.

PKT. Oz. ¼ LB. LB. 10c 60c \$2.00 \$6.50

White Portugal (Silverskin)

The most widely used white onion. An all-purpose variety, for sets, pickling, green bunching, and storage. Bulbs medium sized, thick-flat, clear white, hard, fine grained, and of pleasing flavor. A dependable cropper. Matures in 100 days.

PKT. Oz. ¼ LB. LB. 10c 50c \$1.50 \$5.00

White Lisbon

Grown almost exclusively as an early bunching onion. At maturity the bulbs are large, globular, with thick neck; clear white in color.

PKT. OZ. ¼ LB. LB. 10c 50c \$1.50 \$5.00

ONION SETS

Our onion sets are produced in the best set-growing sections, from our own purebred seed. Careful cleaning, sizing, and packaging at time of shipment, make for arrival in customers' hands in prime condition. Asgrow Sets are second to none in quality and attractiveness. The varieties include: White, Yellow, Red Ebenezer, Golden Globe, etc. Write for prices.

PARSLEY

Petroselinum hortense Moss Curled (Triple Curled)

A compact plant with dark bright green leaves, exceedingly finely cut and curled, giving the appearance of a dense piece of moss. Very desirable for garnishing, and for decorative purposes. Days 70.

PKT. Oz. ¼ LB. LB. 10c 15c 35c \$1.00

Paramount

A recent introduction of triple curled type. Plant slow growing, very dark green, tall and with stout stems for bunching. Days 85.

PKT. Oz. ¼ LB. LB. 10c 15c 35c \$1.00

Plain (Single)

Used largely for flavoring. Leaves bright green, deeply cut, flat, not curled; stem small, solid, without coloration, edible. Days 72.

PKT. OZ. ½ LB. LB. 10c 15c 35c \$1.00

Multicurl

A new strain of curled type developed at the Pacific Coast breeding station. Leaves bright green and very finely cut and curled, giving the fresh appearance of a dense piece of moss. Stems stout, well adapted for bunching. Somewhat slow growing but very attractive in appearance and quality. Days 85.

PKT. OZ. ¼ LB. LB. 10c 15c 50c \$1.25

Rooted Hamburg, Petroselinum hortense var. radicosum

Forms thick, fleshy, edible roots, 8"-10" long, used for flavoring, like celery or celeriac. Leaves plain, deeply cut; stems hollow, tinged with purple; coarse and tough. Days 90.

PKT. Oz. ¼ LB. LB. 10c 15c 35c \$1.00

PARSNIPS

Parsnips thrive in rich soil, deeply dug. Drill 18 inches apart, as soon as the ground can be worked. The roots are improved by frost, and as they are very hardy, may be allowed to remain in the ground all winter.

Hollow Crown (Guernsey)

Most comonly used of all varieties. Root 10"-12" long, 2½"-3" diameter at shoulder; hollow crowned, uniformily tapered. Days 95.

PKT. Oz. ½ LB. LB.

PKT. Oz. ¼ LB. LB. 10c 15c 50c \$1.50

Our Pride

Resembles Hollow Crown, but slightly shorter with rounded shoulder and very free from side roots; uniform, with finely grooved neck; tender, and of fine flavor. An attractive variety. Matures in 95 days.

Ркт. Oz. ¼ LB. LB. 10c 15c 50c \$1.50

PEAS

Peas are cool weather plants and sown as soon as the ground can be worked. The early, small, smooth-seeded varieties should be planted first; the large wrinkled-seeded sorts, which are sweeter and of better quality, are not so hardy and should be sown when the ground is a little warmer.

Allow 2 to 3 lbs. per 100 feet of double row; 2 bushels per acre. Plant 2 to 3 inches deep in 88 inch double rows, 2 feet apart for dwarf sorts, 3 feet for the tall. Pkt. 1 lb., 5 lbs., 10 lbs., 100 lbs.

SMOOTH SEEDED

Alaska

The Asgrow strain—the first pogeny line, pedigreed stock of this variety ever developed—is noted for its pod size and productivity. Fully resistant to Fusarium wilt. Used very extensively for canning; also by gardeners for a first early variety. Plant slender, light green, very uniform in maturing. Pods single, blunt, light green, round, straight, contain 6-8 peas of good qaulity. Seed small, round, smooth, bluish green: 130 per oz. Height of plant 28 inches. Length of pod 25% inches. Matures in 57 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100

Laxton's Superb (Early Bird)

The earliest large podded, dwarf sort. Plant light green, coarse. Pods single and double, curved, pointed, medium green, attractive; contain 9-10 peas of fair quality. Seed dark green, dimpled: 90 per oz. Height of plant 16 inches. Length of pod 4 inches. Matures in 61 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c 30c \$1.40 \$2.50 \$18.00

Canada Field

A commercial sort for field culture, resistant to Fusarium wilt. Plant Pods very tall, medium green. single, blunt, light green; contain 6 peas. Seed small, smooth, creamy white. Height of plant 48 inches. Length of pod 21/4 inches. Days 85. 1 LB. 5 LBS. 10 LBS. 100 LBS. \$1.40 10c 30c \$2.50 \$18.00

WINKLED - SEEDED Alderman (Dark-Podded Telephone)

A handsome large podded variety. Excellent for home garden, for truckers, for shipping to distant markets and for freezing; resistant to Fusarium wilt. Plant dark green, coarse. Pods single, large, plump, straight, dark green, pointed; contain 8-10 peas of highest quality. Seed large, light green: 92 per oz. Height of plant 60 inches. Length of pod $4\frac{1}{2}$ inches. Matures in 74 days. PKT. 5 LBS. 10 LBS. 100 LBS. 1 LB. 10c \$1.75 \$2.75 \$25.00 40c

American Wonder

For the home garden, and very productive. Plant dark green, fairly coarse. Pods single and double, light green, blunt, straight, and well filled with 6 peas. Seed medium sized, largely square; green. Height of plant 12 inches. Length of pod 2½ inches. Matures in 61 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10C 40C \$1.75 \$2.75 \$25.00

Gradus, Improved

Large podded variety for home gardens and market gardeners. Plant medium green, stocky. Pods single, broad, plump, pointed, medium green; contain 8-10 large, sweet, delicious peas. Seed large, cream and green: 100 per oz. Height of plant 34 inches. Length of pod 4 inches. Matures in 65 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 40c \$1.75 \$2.75 \$25.00

Hundredfold

An attractive, large podded sort, for home gardens, for truckers and for shipping. Plant dark green, stout. Pods single, broad, very deep green, pointed, curved; contain 8 large peas of excellent quality. Seed large, wrinkled, yellow and green, somewhat flat: 100 per oz. Height of plant 20 inches. Length of pod 4½ inches. Days 64.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c 40c \$1.75 \$2.75 \$25.00

Laxtonian

For home gardens, truckers, and shipping. Plant dark green. Pods single, broad, dark green, slightly curved, pointed; contain 7-8 large, succulent peas. Seed large, flattish, yellow and green. Height of plant 18 inches. Length of pod 41/4 inches. Matures in 63 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 10c 40c \$1.75 \$2.75 \$25.00

Laxton's Progress

Popular for shipping to distant markets, also for home and market garden planting. Plant medium dark green. Pods single, %" wide, dark green, somewhat curved, pointed, handsome; contain 7-9 large peas of good quality. Seed large, cream with green: 85 per oz. Our strain of this important variety is noted for its solid deep green color. Height of plant 16 inches. Length of pod 4½ inches. Days 62.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 40c \$1.75 \$2.75 \$25.00

Thomas Laxton (Dark Podded)

Excellent for home and market gardens and for shipping, canning and freezing. Plant deep green and medium heavy. Pods single, rich deep green, plump, broad, blunt; contain 7-8 large, tender peas of splendid quality. Seed of medium size, cream and green: 102 per oz. Height of plant 36 inches. Length of pod 3½ inches. Matures in 62 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS

Pride

Plant dark green, open at top, sturdy, very uniform, quite resistant to aphids. Pods mainly double, straight, plump, dark green, well filled with 7-9 peas; highly concentrated in season. Seed medium, green; 120 per oz. Height of plant 30 inches. Length of pod 3½ inches. Matures in 65 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 40c \$1.75 \$2.75 \$25.00

Little Marvel

Outstanding among the older varieties of dwarf peas, Little Marvel continues to be extensively used on account of exceptional quality and yield. Valuable for home and garden and for early shipping. Plant dark green, medium, stocky. Pods single and double, dark green, blunt, plump, well filled with 7-8 tender peas. Seed medium size, light green, squarish: 110 per oz. Height of plant 18 inches. Length of pod 3 inches. Matures in 64 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 10c 40c \$1.75 \$2.75 \$25.00

PEPPERS

Pepper seed is light yellow, about the shape of tomato seed, but flat, hard, and about ½ inch in diameter. It may be sown in the hotbed in March or April, and later transplanted to 3-inch pots until the ground is warm enough to permit setting in the garden. Set plants 3 inches deeper than they were in the pots and 2 feet by 18 inches apart in the hill. Sow seeds outdoors after all danger of frost is past, four or five seeds to the hill, and at distances above given. Thin to one plant when well up.

Hungarian Yellow Wax

A first early, hot sort, valuable for market gardeners and canners. Plant dwarf and prolific. Fruits pendent, medium slender, tapering, smooth and very pungent. Color waxy yellow changing to bright crimson at maturity. Length 6 inches. Diameter at stem 14 inches. Matures in 65 days.

PKT. Oz. ¼ LB. LB. 10c 60c \$2.00 \$6.00

Calwonder, Early

An Asgrow early strain of California Wonder maturing a week to ten days earlier than others. Plant stocky and sturdy, vigorous, prolific. Fruits 3- and 4-lobed, upright, very attractive. Smooth, uniform, deep green changing to bright crimson at maturity; thick, sweet and mild. Particularly desirable in areas of shorter season. Packs well because of its uniformity. Length 4 inches. Diameter at stem 3½ inches. Matures in 63 days.

PKT. Oz. ¼ LB. LB. 10c 80c \$2.50 \$8.00

Missouri Wonder

An extremely large, sweet pepper for home and market garden use. Plant short, stocky, and light green. Fruits pendent, chunky, square ended, and slightly crumpled; deep green changing to deep scarlet. Length 4½ inches. Diameter at stem 4½ inches. Days 80.

PKT. OZ. ¼ LB. LB. 10c 80c \$2.50 \$8.00

Bell (Bull Nose)

A popular, early, prolific sort, with small, erect plant. Fruits pendent, blunt, largely 4-lobed, deep green changing to scarlet red at maturity; ribs pungent, flesh quite mild. Length 3 inches. Diameter at stem 2¾ inches. Matures in 64 days.

PKT. OZ. ¼ LB. LB. 10c 80c \$2.50 \$8.00

California Wonder, Improved

For market garden and shipping. Plant vigorous, upright, prolific. Fruits mostly 4-lobed, upright, slightly longer than standard strains; very attractive, smooth, uniform and deep green, changing to bright crimson; flesh very thick, sweet and mild. Length 4½ inches. Diameter 3¾ inches. Matures in 75 days.

PKT. Oz. ¼ LB. LB. 10c 80c \$2.50 \$8.00

King of the North

An early strain of Ruby King, introduced by Joseph Harris Co. in 1934, especially for shorter season areas. Prolific plants, somewhat smaller than regular Ruby King, though fruits are of good size and quality. Length 5 inches. Diameter at stem 3 inches. Matures in 64 days.

PKT. OZ. ¼ LB. LB. 10c 80c \$2.50 \$8.00

All Prices are Subject to Change Without Notice

Long Red Cayenne

A favorite hot variety, used largely for canning, and in pickles; also for drying. Plant large and productive. Fruits tapering, pendent, frequently twisted; very pungent; deep green changing to brilliant red. Length 5 inches. Diameter at stem 34 inches. Days 70.

PKT. OZ. ¼ LB. LB. \$6.00

World Beater (13)

A valuable large variety for market gardens and shippers, from a cross of Chinese Giant and Ruby King. Plants vigorous, upright, and very productive. Fruits 4-lobed, smooth; color glossy green changing to bright red; flesh thick, mild, and very sweet. Length 5 inches Diameter at stem 3¾ inches. Matures in 75 days.

RADISHES

For well-shaped radishes the ground should be thoroughly pulverized and enriched with some well-rotted manure and fertilizer. Fresh manure must not be used. First sowings are made very early, as the radish is hardy, and successive sowings up to hot weather. To avoid pithiness the crop should be grown quickly and pulled promptly when mature. Rows are 12-15 inches apart and sown ½ inch deep, allowing one ounce to 100 feet or 10-12 lb. to the acre.

Comet Globe, (Medium Top)

Our pedigreed originator's stock of this very popular variety is outstandingly good, and well adapted to both field culture and greenhouse forcing. Roots oliveshaped, with medium top; bright scarlet, crisp, tender, and of fine quality. Matures in 24 days.

Scorzonera hispanica

A hardy perennial grown for its long, slender roots, black outside, white within. Superior in flavor to salsify but not quite so easy to raise.

SORREL

Rumex acetosa

French Broad Leaved

The variety generally used by home and market gardeners for spring salads. Leaves large, oblong, medium green, of bitter-sweet flavor. Matures in 60 days.

Narrow Leaved (Silver leaf)

Popular with critical gardeners on account of its long, slender, attractive, bright green leaves, with slightly acid flavor.

Matures in 60 days.

PKT. OZ. ¹/₄ LB. LB. 10c 40c \$1.25 \$4.00

SPINACH

Spinacia oleracea

Spinach seed is commonly grown in the Netherlands of Europe where conditions are well suited to its production, but for some years past Asgrow spinach seed crops of the finest quality have been grown in the Northwest.

Spinach demands rich, light soil Sow seed in early spring, l

inch deep, in rows 12 inches apart, and make additional sowing every two weeks for a succession. For fall use, sow in August, and for a winter crop, in September.

Varieties marked s.s. are smooth seeded; those marked p.s. are prickly seeded.

Bloomsdale Savoy, Reselected, s.s.

A first early, vigorous variety. Plant fast growing, uniform, hardy and attractive. Leaves large, ovalshaped, curved, healthy savoyed, dark glossy green.

Bolts quickly. Matures in 39 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS.

Giant Nobel (Giant Thick Leaved) ss
Introduced by Zwaan & Van der
Molen: All-American Silver Medal
for 1933. Very valuable for market
gardens and canning. Plant large
vigorous, and spreading; slow to
form seed stalks, and an extremely
heavy yielder. Leaves very large,
thick, smooth, pointed, with rounded
tip; medium green, tender. The best
of the smooth thick-leaved sorts.

Matures in 45 days.

PKT. 1 LB. 5 LBS. 10 LBS. 100 LBS. 100 LBS. 100 LBS. 44.50 \$40.00

New Zealand, p.s.

Tetragonia expansa

Not a true spinach, though similar when cooked. Native of New Zealand, quite distinct in habit of growth; thrives in hot, dry weather. The large, spreading plants have small, thick, pointed, deep green leaves, which can be picked repeatedly throughout the season. Seeds are large and hard-horned; should be steeped, and planted only in warm soil. Matures in 70 days.

SQUASH

The Squash requires a good, rich soil. Plant seeds of Bush Squashes in hills 3 to 4 feet apart, 8 or 9 seeds to a hill, and thin out to four plants when danger of bugs is past. Sow vining sorts 6 to 8 feet apart each way.

One ounce of early Squash seed will plant about 25 hills; one ounce of Marrow Squash, about 50 hills.

Table Queen (Des Moines: Acorn)

Desirable for home and market garden use, also for shipping. Oval fruits, pointed at the blossom end, ribbed, smooth, thinshelled, dark green. Flesh light yellow; bakes well with sweet, inviting flavor. An early maturing variety which can also be planted for summer use.

Golden Table Queen is similar except for external color.

Similar to Early Yellow Summer Crookneck, but larger and later. Fruits weight 4-5 lb.; neck curved; skin lemon-yellow, warted; flesh thick and yellow. Length 20"; Diameter 4½"; Days 58.

Giant Summer Straightneck

Packs for shipping to better advantage than Crookneck. Popular with market gardeners and shippers. Fruits thick-necked, heavily warted, straight lemon-yellow; flesh thick, light yellow. Length 18"; Diameter 4½"; Days 60.

PKT. Oz. 1/4 LB. LB. 10c 20c 60c \$2.00

White Bush Scallop (Patty pan)

An old favorite for home and market gardens. Fruits pale green when very young, becoming white as they grow, to 2½ lb.; shaped somewhat like a round pie or patty with scalloped edges. Length 3"; Diameter 7½"; Days 52.

PKT. OZ. ½ LB. LB. 10c 20c 60c \$2.00

Buttercup

Developed by Prof. A. F. Yeager at North Dakota Agricultural College. Shape similar to that of Turban, 3½ lb. Rind thin and tough, dark green with narrow gray stripes and slight mottling. Orange flesh cooks sweet and dry. A small, thick, fleshed squash of good storage and eating quality. Length 4½"; Diameter 6½"; Days 100.

PKT. OZ. 1/4 LB. LB. 10c 35c \$1.00 \$3.00

Warted Hubbard

Somewhat larger than Improved Hubbard, and more thickly covered with warts. Fruits about 14 lb., pointed at each end, very dark green; flesh deep orange-yellow, dry, and sweet. A prolific, good keeping sort. Length 13"; Diameter 9½"; Days 110.

PKT. Oz. ½ LB. LB. 10c 20c 60c \$2.00

TOBACCO

Judge's Pride

Improvement over White Burley.

PKT. OZ. ¼ LB. LB. 10c 75c \$2.50 \$8.00

Connecticut Seed Leaf

Grown principally for the manufacturer of cigars. Hardy, prolific, and well suited to production in the North and Central States.

PKT. Oz. ¼ LB. LB. 10c 75c \$2.50 \$8.00

Havana

An early variety used largely for cigar wrappers, on account of the thinness and fine quality of the large leaves. Often planted in fields artificially shaded.

PKT. OZ. ¹/₄ LB. LB. 10c 75c \$2.50 \$8.00

White Burley

A prolific sort, with long, broad, attractive leaves; used for fillers and wrappers.

TOMATO

Lycopersicum esculentum

New varieties are being developed at our breeding stations and older varieties improved through individual cultures produced under expert handling. Disease resistance, attractiveness of color, thickness of walls, and heavy cropping qualities have been attained to a high degree. Seed is also available of leading shipping and canning varieties, certified as to purity and freedom from disease by various State Departments of Agriculture.

The number of days indicated represents the time required from setting of plants to produce marketable fruits. It takes 4-5 weeks to produce plants for field setting.

Varieties marked r. are red fruited; y. yellow; p. pink; and s.f. small fruited.

Sow in hotbeds or indoor flats using fresh soil. Keep the young plants free of insects and about 6 weeks later when danger of frost is past transplant to reasonably rich soil, setting the plants 3-4 ft. apart. Various methods of staking and training the vines are in use and the grower should study these and adopt the one best suited to his acreage. One ounce will make 1500-2000 plants and 5000-6000 plants are needed to set an acre. *For Staking or Vining.

*Break O' Day, r.

Introduced by the U. S. Dept. of Agriculture in 1930. Has considerable resistance to wilt and nail-head rust. Plant light, of open, spreading habit, with medium foliage; early

and very prolific. Fruits medium large, orange-red, uniform, globe-shaped, smooth; walls not as thick as in Marglobe. The yellow cast in color and light vine growth are drawbacks to this variety. Days 70.

PKT. Oz. 1/4 LB. LB. 10c 75c \$2.50 \$8.00

*Super Break O'Day, r.

Now fairly established in many sections as the leading early variety for garden, shipping and canning. Plant of medium growth, fairly open, very prolific. Fruits medium large with thick wall structure, globular, smooth, free from flat sides; bright scarlet, ripening well to the stem, exceptionally attractive. Handsome in appearance and very uniform. Adapted to both field and greenhouse production. 70 days.

PKT. OZ. 1/4 LB. LB. 10c \$1.00 \$3.00 \$10.00

*Super Globe, r.

Well adapted to green-wrap shipping; particularly desirable for truckers and shippers in Florida and Texas. Resembles Break o' Day and is similarly disease resistant, but has a positive bright red color. Plants have much heavier foliage, affording better protection from sun-scald. A heavy cropper. Fruits medium large, globular; firm, and solid; interior ripens slowly. Best adapted to sandy loam soils of the lighter type. Matures in 68 days.

PKT. OZ. ¼ LB. LB. 10c \$1.00 \$3.00 \$10.00

Valiant, r.

Introduced by Francis C. Stokes Co. in 1936; adapted to short-season areas and the early market. Plant sparse and open; fruits large for an early variety, globe shaped and of bright scarlet color. 70 days.

PKT. OZ. ½ LB. LB. 10c \$1.00 \$3.00 \$10.00

*Rutgers Certified, r.

A recent introduction by the New Jersey Experiment Station which has deservedly achieved general popularity. Primarily intended for canning, has also proven a good green-wrap shipper and all-purpose variety of wide adaption. Bred from Marglobe and J.T.D., it combines the best qualities of both, including Marglobe's resistance to disease and I.T.D.'s habit of ripening from the interior outwards. Plant large with thick stems and vigorous foliage. Fruits globular; bright red, smooth and thick walls and small seed cells. 86 days.

PKT. Oz. ½ LB. LB. 10c 75c \$2.50 \$8.00

*Scarlet Dawn, r.

Developed at the Asgrow Eastern breeding station from a cross of Clark's Early and Marglobe; earlier in season than either parent. All-America Gold Medal for 1935; now fairly established in many sections as the leading early variety for garden, shipping and canning. Plant of medium growth, fairly open, very prolific. Fruits medium large with thick wall structure, globular, smooth, free from flat sides; bright scarlet, ripening well to the stem, exceptionally attractive. Handsome in appearance and very uniform. Adapted to both field and greenhouse production. 70 days.

PKT. OZ. ¹/₄ LB. LB. 10c 75c \$2.50 \$8.00

*Purple King, p.

Used widely in the South for shipment to Northern markets. Plant vigorous, rather open, medium height. Fruits medium large, globular, smooth, purplish pink, thickskinned, very solid and quite free from cracking. 80 days.

PKT. Oz. ¼ LB. LB. 10c \$1.00 \$3.00 \$10.00

*Indiana Certified Baltimore, r.

Is particularly desirable for canners and market gardeners of the East and Midwest; certified free from seed-borne diseases by Purdue University Agricultural Experiment Station. Plant large with medium heavy foliage. Fruits large, thickflat, smooth, deep red, solid and attractive; good for juice as well as regular pack. Matures in 79 days.

PKT. OZ. ¹/₄ LB. LB. 10c \$1.00 \$3.00 \$10.00

Be sure and plant plenty of tomatoes this year.

*Marglobe Certified, r.

Introduced by the U.S. Dept. of Agriculture in 1925, this main crop variety has come into wide use by truckers and shippers, and in some sections by canners. Plant vigorous, with heavy foliage, resistant to Fusarium wilt and nail-head rust; moderately productive. Fruits medium large, nearly golbular, deep red, smooth, solid, with thick walls and cross-sections; of fine quality. Matures in 77 days.

> 07. 1/4 LB LB 10c \$1.00 \$3.00 \$10,00

*Southland

A fine new main crop shipping and canning tomato, also suitable for home and market gardens, matures in season with Rutgers. Southland staked and pruned, it does equally well untrained. Nearly globe shaped, with thick, solid flesh walls like Marglobe and Rutgers, it is of splendid market, canning and shipping type, with good scarlet color.

Practically immune to fusarium wilt and resistant to collar rot caused by Alternaria, it is also resistant to some forms of late blight (Phytophthera). Matures in 86 days.

Oz. 1/4 LB. 25c \$1.25 \$3.50 \$12.00

Stokesdale, r.

Introduced by the Francis C. Stokes Co., an attractive second early variety of wide adaptability and heavy yielding ability. Fruits smooth and practically spherical, medium large in size and of good red color. Matures in 73 days.

> PKT. Oz. 1/4 LB. \$2.50 10c 75c \$8.00

*Super Bonny Best, r. Fruits of medium size, bright scarlet-red, smooth, globe-shaped with heavy side walls and small seed cavities. Very free from cracking and puffiness. Matures in 100 days.

TURNIP

For summer greens or roots sow early in drills 12-15 inches apart for hand cultivation; 24 inches apart for horse cultivation, and press the soil down firmly. Thin out when the plants have grown to about 1 inch high. Sow again in the summer for fall and winter use. Allow one oz. for 100 feet of row, 2-3 pounds per acre.

Purple Top White Globe (w)

The most popular variety for home and market gardens, and for shipping. Tops dark green, large, erect, cut leaved. Roots large, globe-shaped, very smooth, upper part purplered, white below; flesh white, sweet, crisp and tender. Our strain is very uniform and attractive.

Diameter 4 in.; Days 57.

PKT. Oz. ½ LB. LB. 10c 15c 35c \$1.00

Purple Top Milan (w)

An extra early sort for forcing or general use in home and market gardens. Tops small, strap leaved. Roots very flat, white with purple top; flesh clear white, fine grained, sweet and tender. Diameter 3½ in.; Days 42.

PKT. Oz. 1/4 LB. LB. 10c 15c 35c \$1.00

Purple Top Strap Leaved (w)

A medium early, very productive variety, used extensively in home and market gardens. Tops medium small, upright and compact. Roots flat, purple-red at the top, white below; flesh. Diameter 4 inches. Days 46.

WATERMELON

Citrullus vulgaris

In addition to the production of regular stocks definite attention is directed at our Southern breeding grounds to the development of improved strains of important varieties resistant to Fusarium wilt. The number of days represents the time required to produce full-grown fruits in the seed-growing sections.

One oz. will sow about 50 hills. Watermelons should have the same culture as muskmelons, but should be planted 8 to 10 ft. apart, depending on the variety.

Dixie Queen

A very prolific, shipping type of excellent quality. Fruits oval-round, light green with dark green stripes, weight 30 lbs.; rind thin but tough. Flesh bright red, crisp, and quite free from fibre; seed small, white and few. Sometimes incorrectly described as white-seeded Cuban Queen. Wt. 30 lbs.; Days 85.

PKT. OZ. ¹/₄ LB. LB. 10c 30c \$1.00 \$3.00

Early Kansas (Indiana Striped: Russian Red-seeded: Kansas Queen)

Has become very popular in the Midwest. A heavy cropping variety for local markets and shipping. Fruit large, nearly round, bright green with broad, wavy stripes of lighter green. Flesh bright red, thick, free from stringy heart, of excellent flavor; rhind thin and tough; seed brownish red when immature changing to buff when dry. Weight 30 lbs.; Days 80.

PKT. OZ. ½ LB. LB. 10c 20c 60c \$2.00

Stone Mountain, Improved

Fruits very large, oval-round with blunt ends; medium green with indistinct veining, rind thin but fairly tough. Flesh rich scarlet, fine grained and very sweet; seed white with black edge. Weight 35 lbs.; Days 90.

GET REAL LAWN PLEASURE

For a lawn that can "take it" feed VIGORO, complete plant food. Vigoro supplies grass the vital nourishment required from the soil to attain sturdy growth and beauty.

Vigoro is balanced for grass. It helps

Controls most . . .

Chewing insectsSucking insectsFungus diseases

grow extensive root systems that stand up well under hard play and continuous usage.

You'll prefer Vigoro because it's clean, odorless, sanitary and easy to use. Include it on your seed order.

A few strokes of the exclusive EndoPest dust gun envelops your plants in an almost-invisible protecting film ... gives you control over most chewing insects, sucking insects and fungus diseases. Use with confidence on edible fruits and vegetables.

Spray ugly weeds away with EndoWeed, improved selective lawn weed killer. EndoWeed penetrates the entire plant. Kills dandelions, chickweed, plantain and over 100 other weeds, roots and all, yet will not harm ordinary grass. ½pt.treats 2000sq.ft.oflawn.

End o Pest

By the makers of VIGORO

Endo Weed

HOW TO MAKE A LAWN

The best soil is a good medium texture; the surface should be thoroughly pulverized and smoothed to the desired grade, removing all large stones, roots and hardened pieces. When the soil is firm, level and suitably moist, sow Lawn Grass Seed at the rate of 75 to 100 pounds per acre, or a pound to 200 square feet (a space 10x20).

It is unwise to be two economical in the quantity of seed used, if the best results are desired. The seed should be sown broadcast and as evenly as possible, then given a thorough rolling or tramp well with the back of a spade. Seed must be well firmed in soil. Our lawn seed does not contain Crab Grass seed.

SOWING

The sowing of grass seed in later summer or fall is highly recommended. Sowing at this time of year causes the young grass to "stool out," whereas if planted during hot weather it tends to grow tall and slender. For this reason it requires a greater quantity of seed. Fall planting is also beneficial in that it prevents the re-seeding of weeds. Spring planting is also satisfactory, but should be done early in order that the young grass will obtain a good growth before warm weather.

Water thoroughly. It is advisable to "soak" the ground until the new grass has been cut.

New turf should have its first cutting when the grass is from 2 to 3 inches long. Set the blades of the mower high to clip only the ends of the young grass.

The continuous growing of one crop impoverishes the richest soil. Blue grass is no exception and when not fed with the proper fertilizer, soon turns sour. Blue Grass is a permanent crop and requires richer feeding than most crops. It must be thoroughly enriched if it is to live and grow.

IMPROVING THE SOIL CONDITIONS

Often your topsoil is of very poor texture. Either it is of heavy clay, composed of fine particles—or it is coarse sand, containing quantities of gravel. Either special material or a special lawn seed mixture may adequately cope with the deficiencies. Soil reports may show an urgent need of organic matter such as peat moss, manure or humus. Peat moss will not always improve the structure of sandy or clay soil. Some soils will directly benefit from peat moss only if it is thoroughly incorporated with the topsoil to a depth of at least 4 to 6 inches. Since peat moss provides soil with very little plant food, it is primarily valuable for its ability to retain moisture. Avoid using peat moss as a topdressing or as a layer over the soil. This causes a shallow root system and a weak turf.

LIME

Lime is often recommended after a soil analysis. Use it only as prescribed and not as an annual application. Lime is not a fertilizer but releases beneficial plant bacteria already in the soil. Excessive applications of lime will often encourage some types of weeds and clover.

Soils that are naturally alkaline require no lime. Others, coastal New England for instance, are naturally acid and as a rule require lime every few years. Agricultural ground or pulverized limestone is usually applied at the rate of 50 pounds per 1,000 square feet. More or less is desirable depending on the acidity and structure of the soil. If you use hydrated lime, use only one-half to three-quarters of the recommended amount of ground limestone.

FERTILIZER

Don't misunderstand the application of fertilizer at seeding time. In the early stages of growth, grass plants require phosphate—a root building material. Used properly, nitrogen and phosphate are the most important elements in the growth of turf. Potash is required by grass in minute quantities, and most soils provide enough of it for the early stages of growth. Do not use a highly nitrogenous fertilizer in preparing the seedbed. It may cause over-stimulation of the foliage and under-development of the roots. Bone meal or super-phosphate at the rate of 20 pounds per 1,000 square feet is usually sufficient for all but the most deficient soil.

VARIETIES OF FILLER GRASSES AND THEIR USES

Orchard Grass—coarse, tufty variety, very unsightly in lawns.

Timothy—best suited to hay fields or pastures; in a lawn it produces a coarse, stubby growth light green in color.

Meadow Fescue—coarse and tufty, best suited on wet pasture land, not adapted to lawns.

Cheaper mixtures are available for temporary lawns. They contain little or no permanent grasses and most of the ingredients will live only a year.

Special mixtures are available for areas such as athletic fields, terraces, shaded spots and extremely sandy soils. However, be sure to ascertain whether the mixture you select actually contains enough grasses suitable to your existing conditions.

There is a list of the grasses most commonly found in lawn seed mixtures. Use this list as a buying guide—check the contents analyzed on the package and compare values.

Group 1, Base Grasses—thrive indefinitely after proper establishment.

VARIETIES OF BASE GRASSES AND THEIR USES

Colonial Bent—for lawns and putting greens, sunny areas only.

Velvet Bent—for lawns and putting greens in sun and shade.

Kentucky Bluegrass—for lawns only in sun or high shade.

Chewings Fescue—for lawns, in sun, shade, terraces, poor sandy soils and play areas.

Creeping Red Fescue—for lawns in sun and shade or areas receiving heavy traffic.

Group 2, Nurse Grasses—quick growing, seldom live over three years. Not more than 50% of this type goes into a good mixture.

VARIETIES OF NURSE GRASSES AND THEIR USES

Redtop—nurse crop, perennial for three years when mowed.

Common Ryegrass—annual, very coarse.

Italian Ryegrass—annual, very coarse.

Perennial Revgrass—lasts several years, moderately coarse.

Group 3, Special Purpose Grasses—some are short-lived and some long-lived. Main advantage is their ability to thrive under adverse conditions—in the shade, on sand, terraces or putting greens.

VARIETIES OF SPECIAL PURPOSE GRASSES AND THEIR USES

Rough Bluegrass (Poa trivalis)—for shade only, prefers moist conditions.

Seaside or Creeping Bent—for putting greens, sunny areas.

Annual Bluegrass—thrives best in very wet or shaded areas.

White Clover—added to lawn mixtures for appearance, winter-kills badly.

Wild White Clover—same as White Clover, finer, more perennial, withstands the winter cold and summer heat better.

TURF-MAKER

Contains only the highest quality turf grasses with a small amount of Redtop as a nurse grass. Over 97% perennial grasses. There is a Turf-Maker adapted to your soil and climatic conditions.

Lb. \$1.40

5 lbs. \$6.75

Annuals

A.—Annuals are plants that flower, seed and die within the year. Hardy Annuals will stand some frost. Half hardy Annuals will stand very little frost. Tender Annuals will not stand frost, and should be planted in boxes in protected places, ready to transplant in the open as soon as frost is past.

Biennials

B.—Biennials are plants that flower during the season after planting. then seed and die. Biennials will stand some frost. They should be seeded in time to be transplanted out during good weather, to get well established before frost.

Perennials

P.—Perennials are plants that flower the following season after planting and continue from year to year. In most cases, propagation may also be made by dividing the roots from full grown plants. There are hardy Perennials, half hardy Perennials and tender Perennials. Seeds of most Perennials should be planted in late summer or early fall, so as to become well established plants before they are transplanted to permanent locations.

Plants, other than climbers, given as being 3 feet or more in height, may be used as backgrounds; 2 to 3 feet for borders; 10 to 20 inches for bedding and borders; less than 10 inches for edgings.

Super Crown O'Gold, Imp. Large, well formed flowers, overlaid petals. Desert Gold, yellow shades. Pkt. 10c; 1/4 oz. 75c.

Haageana Double, Mexican Hybrids. Small flower, of brilliant and attractive combinations of Mexican colors. Height, 15 inches. Pkt., 10c; 1/4 oz., 50c.

Cupid. Small button-like flowers, dwarf, 1 foot, well formed plants. Finest mixed. Pkt., 10c; 1/4 oz., 50c.

Fantasy. New type, shaggy flowers, medium size, gracefully quilled, 2½ feet. Finest mixture, bright colors. Pkt., 10c; ¼ oz., 40c; 1 oz., \$1.00.

Harmony Type. 2½ to 3 feet, medium sized flowers, resembling Scabiosa. Mixed. Pkt., 10c; ¼ oz., 50c.

TOP QUALITY FIELD SEED FOR THE CRITICAL BUYERS

No value is more outstanding. Our customers who use this seed like it because of the results that it gives. It produces good clean stands. The growth is vigorous and hardy. The yields are heavy and the quality of the hay excellent. We are very fortunate in having some unusually good buying connections in the sections that produce our seeds. Buying in large volume, plus Antoine's Direct to You Policy means big savings.

All Field Seeds are tested and tagged in compliance with your State Seed Laws, Tested and Recleaned. Field Seed, net cash, F. O. B., Independence, Mo. All seeds billed gross for net-bags included. No charge made for bags. Prices quoted are for immediate shipment. Send your inquiry, stating quantity and time of shipment desired.

ALFALFA

Sow 18 to 22 Pounds to the Acre

Alfalfa produces a hay crop of from 3 to 10 tons per acre, a valuable seed crop, and enriches the soil.

It will thrive on almost every soil except a wet one. Alfalfa is sown in the spring and fall. Seed bed must be carefully and thoroughly prepared, should be firm, moist and surface loose, mellow and finely pulverized. The entire field should be made as smooth as possible.

CLOVERS

RED CLOVER

Sow 16 pounds per acre for forage crop.

Sow 8 to 14 pounds per acre on small grain crop.

CULTURE. Sow clover seed during late winter or early spring—when the soil is honeycombed by frost. Clover is usually sown to land previously seeded with a grain crop. Thus, no special land preparation is necessary, with grain crop removed, and clover already there.

WHITE BLOSSOM SWEET CLOVER Sow 20 to 30 Pounds Per Acre

Thrives on any type of soil and under almost any climatic conditions. Will grow on sandy soil or heaviest clay; on stony hillsides or loose loams; where rainfall is heaviest and where it is too light to produce Red Clover or Timothy. Will stand more acid in soil than Clover or Alfalfa and is less dependent on good drainage than Red Clover.

YELLOW BLOSSOM SWEET CLOVER

This is also a biennial and preferred by some people on account of its earliness. It is about two weeks earlier than the white, does not grow quite as tall and not as heavy or as course. Do not confuse this with the Annual Yellow Blossom which is of very little value.

LADINO CLOVER

The New 4-Purpose Pasture Clover

This clover is largely used for pasture but it also can be put in a silo or cut as a hay crop. It has big profit possibilities as a seed producer of the season is not too wet.

Ladino is a widely adapted, easy to start, perennial clover. It is very palatable and nutritious. High in mineral and protein content. It is among the earliest legumes to start growth in the spring. Produces abundantly on upland of fair to good fertility. Will stand wetter land than Alfalfa or Red Clover. Good on loam and clay land.

Prices subject to change without notice.

It will grow two to four times as large as White Clover and six times as big as English Wild White Clover. Stems are erect, 10 to 15 inches long. Also has fleshy creeping stems that root at joints. Covers the ground thoroughly. One plant may occupy 2 or 3 square feet of space. Blossoms are as large as Red Clover. It is especially valuable mixed with other grasses like Timothy, Blue Grass, Orchard Grass and is sometimes used with Red Clover or Alfalfa in pastures.

A little goes a long way. There are over two million seeds in a pound. You can top seed on thin pasture in February or early March without covering. New seeding should be made on a firm well packed seed bed. Roll, if you can, before and after seeding. Two pounds per acre is plenty. In mixture, I pound is ample. Even half a pound will provide over 10 seeds per square foot.

TIMOTHY

Grasses may come and grasses may go but Timothy goes on forever. Timothy is a grass that has been grown for many years. New grasses have come in and some have predicted that they would replace Timothy altogether. The amount of Timothy seed used, however, is about as large as ever. Possibly this is due in part to the fact that more grass seed is being sown. The reason Timothy maintains its popularity is because it is one of the surest grasses to make a stand. It grows on a wide area of soils. It is adapted to a wide range of climates. It helps to check soil washing better than straight clovers. It can be used alone or in combination with clovers and alfalfa to produce valuable money making crops. You can make money out of hay, pasture or seed. A seeding lasts for several years. It only takes 10 to 12 pounds to the acre. Therefore it is one of the most economical grasses to sow.

Brome Grass

One of the Most Valuable of All Grasses

There is a tremendous interest in Brome Grass throughout the northeastern quarter of the United States. From Kansas to the Dakotas, across the entire nation, Brome Grass is showing itself to be a very profitable crop. Practically every state experiment station has one or more bulletins or circulars telling about this great crop. They all praise its drought resistance which comes from its deep root system. Its palatability which it keeps even after plants are dry. Many give reports on the high feeding value and heavy production of Brome especially when grown with Alfalfa.

Brome-Alfalfa mixture better than straight Brome, at rate of 12 lbs.

Brome and 8 lbs. Alfalfa per acre. Alfalfa furnishes nitrogen, keeps Brome from becoming "sod-bound." Kansas or native

Meadow Fescue

(English Blue Grass)

Revived interest in this excellent grass. Suitable for lawns and fine for pasture. Long-lived perennial, for all soil types; does well on poorlydrained land.

For Lawns it is much preferred over Ryegrass, being less coarse and bunchy and long-lasting. Fights crabgrass.

Pride\$6.00 \$25.00

Crested Wheat Grass

REED CANARY

SUDAN GRASS

Do not sow until corn planting time or after. Prepare a good seed bed like that for Corn. Drill in close rows or broadcast. Cover the seed about an inch deep. Sow 20 to 25 lbs. per acre. Begin pasturing it when it is about 8 inches high. It can be pastured until frost. Many consider it best not to pasture Sudan after frost as there is some danger of prussic acid developing while it is in a dying condition. Any growth there may be at that time can be used for hay and silage to be fed later. Generally cut for hay when in bloom, but can be cut earlier or later.

Place Your Order Early. For your convenience we suggest use of order blank either in rear or front of this catalog.

Sweet Sudan Grass

Here's something so new, so different and so superior to the old regular Sudan, that we predict it will replace it in a few years. It is a crop that was developed by crossing regular Sudan on Leoti. Leoti is a heavy yielding, sweet juicy sorghum. It has high resistance against disease and shattering of seed. Sudan is a fine stemmed member of the cane family that stools freely. It makes wonderful hay, but it is not sweet. In making this cross the best of these two crops was put into one. It grows very much like ordinary Sudan, stools even more freely and grows taller. The leaves are a little broader. It is a sensational yielder. This is so new that widespread yield reports are not as yet available. We do know that regular Sudan will produce up to 10 tons of hay per acre. Sweet Sudan with its free stooling, taller growth and broader leaves, should outvield it at least 30%.

The World's Most Extensive Line of Hybrid Corn Strains

Wherefore Corn is Grown, Funk's G Is a Great Hybrid

Nation-wide Funk Research has developed adapted strains of Funk's G-Hybrids for every territory from Canada to Mexico and from the Atlantic Coast to the Rocky Mountains. Our Peppard production areas in Missouri and Kansas are part of more than 50 production areas where a total of 71 distinct commercial G-Hybrids are being produced for farmers this season.

The 15 Funk's G-Hybrids that we are producing are those strains from the entire line that best meet the requirements of the Southwest Corn Belt. These 15 selected and proved G-Hybrid strains are listed below. In the order of their maturity they are:

Standard Hybrids

(Multi-Perfected) 813

This is a most oustanding Hybrid made up of five Inbred lines. This gives a longer pollinating period in years of hot winds. That means better filled ears. This corn has produced 151.9 bu. per acre. It can take a lot of punishment. One of Iowa's highest officials living in southern Iowa grew it on hill land which was not his best. It froze black after it was 6 inches high, yet came back to yield 75 bu. per acre which was his best corn that year. Another prominent farmer had 30 inches of water over his field twice in 3 weeks, yet it made 60 bu. per acre.

It is deep grained, strong stalked, disease resistant corn that does well on any medium to rich land. It's a great Hybrid.

\$10.00 \$9.50 \$7.75 \$6.75

U. S. 13 Certified

This famous hybrid is known throughout the nation wherever 110 to 120 day varieties are grown. It is famous for big yields and fine feeding quality. All U. S. 13 seed is not equal in yielding ability. Differences of over 15 bushels per acre are officially recorded. Standard Multi-Perfected U. S. gives you this variety at its best.

\$4.50 \$9.00 \$17.90 \$45.00 Heavy Assorted

\$4.00 \$7.00 \$13.90 \$39.00 All baby chicks are guar-

All baby chicks are guaranteed from 100% Blood-tested Stock. Tested by the stained antigen method for Salmonella Pullora (Bacillary White Diarrhea Disease) and Fowl Typhoid.

BETTER BABY CHICKS

All stock having been culled for the past 8 years for egg production. All flocks are on a uniform feeding program in order to assure you a better baby chick.

A Baby Chick can be no better than its ancestors, so why take a chance on an order of chicks?

C. O. D. PLAN: Send \$1.00 for each 100 chicks or any number less than 100. Pay balance on delivery plus transportation charges. If you want chicks shipped C. O. D. for balance be sure to specify this in your order.

A A A GRADE CHICKS

1949 should be a fine year for poultry. Flocks are scarce everywhere and there is plenty of feed at a reasonable price.

Our program of flock improvement . . . blood-testing to guard against disease, culling and checking . . . means your chicks come to you vigorous, healthy, and as free from disease as we can produce them. Only strong, properly fed breeders are used. A superior male bird is of great importance, because he is mated to a number of females. Therefore it is possible for him to transmit characteristics to a large proportion of the chicks produced by the whole pen.

FEEDERS	Electric Brooder, 100 chick size	WATERERS
10 inch\$.15	Oil Brooder, 300 chick size Oil Brooder, 500 chick size	1 quart\$.45
18 inch	Hoovers	½ gallon
24 inch	Canapy Brooders, 500 chick size	l gallon 1.10
36 inch	Electric Brooder, 1500 chick size	2 galons 1.80
48 inch 1.60	Chick Waterers to fit Mason jars, each	2 gal heavy 2.20

We have listed only a few of the brooders and waterers that we have on hand. If you have any other equipment in mind, write us, and we will quote you prices. We reserve the right to change prices without notice.

18 x 18	19,000	30 x 12	17,500	60 x 60	1,700

THE ANTOINE SEED COMPANY gives no warranty, express or implied, as to the productiveness of any seeds or bulbs it sells and will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seed.

^{*}Inches between rows varies with method of cultivation, etc.

^{**}For medium soils. A little more in sandy soils, a little less in heavy soils. Moisture is also a factor.

^{***}The figures refer to stand of plants, not rate of seeding.
